

FORMULA STUDENT **SWITZERLAND**

Introduction

First of all, welcome to everyone interested in knowing more about Formula Student Switzerland. We really appreciate your interest and want to keep you up to date with all the important details.

As you already figured out, we are organizing a Formula Student event in Switzerland. So let's start with what is special about FS Switzerland:

- Electric (EV) only Formula Student event
- 25 teams in total

Our goal is to create an amazing event, with the best experience for both the students and the sponsors. We already have quite a few interesting ideas on how we want to distinguish this event from the others.

Airfield Interlaken

The location of the event is already breathtaking by itself. Situated directly in the mountains, Interlaken is known worldwide for its incredible panorama view. As you may already know, there are no racetracks in Switzerland, but to have a really cool Formula Student event you need a big place to build up a curvy track.

Therefore, an airfield is quite optimal. We could even build up a 1 km long acceleration event and if the teams invert their aerodynamics, we would have the possibility to have flying cars.

With the hangar and other buildings, we have enough space for the pits and big gatherings. The areas in front of the hangar will be used for the practice area and the brake test.

Another remarkable feature of this area will be the possibility to have the camping nearby. We are currently in discussion with the owner about this, but if everything goes according to plan you would sleep 200m away from you workstations. This is of course a dream for everyone who has attended a Formula Student event before.

In addition, the area is near a river and two beautiful lakes, which is perfect for a relaxing evening after a hard day when the event activities are done.

Looking for Volunteers

If you have any interest to come to our event and support us you can apply on our website: www.fsswitzerland.ch or write us an E-mail.

At the moment we are building up our team and we appreciate any help we get.

We are also on the lookout for volunteers who want to help us with our social media.

We are constantly working on our website and trying to improve, therefore we welcome any feedback.

Important Dates

Milestones which you should keep in mind:

- 1. October 2019 Creation of team account on the website
- 31. January 2020 Team Registration
- 15. - 19. July Formula Student Switzerland event

Next Steps

We plan to publish the first draft of the handbook towards the end of the year.

We also plan to make a quiz for the event.

Besides looking for amazing people as volunteers we are looking for interested companies that want to support our event.
